| 授業概要   |            | Critical thinking is a skill that can be applied to every part of your lives, including how you study English. In this task-based course, we will be looking at topics that are relevant to your lives, and discussing them using critical thinking skills—in other words, not WHAT to think, but HOW to think. Not only will you be students, but you will also be expected to take on the roles of researchers, designers, presenters, leaders, and even teachers.  Within each class, we will examine a current topic from a number of perspectives. We will also look at a specific critical thinking skill, and see how we can apply it to that topic. In preparation for the classes, you will be expected to research material related to the topic, and be prepared to discuss it in English in the class.  During the semester, you will also be working on a personal project. You will present this at the end of the course to show how your skills of critical thinking have developed through the semester. |          |       |         |          |                   |           |          |          |
| 学生が達<br>行動目標   | :成すべき<br>! | Students taking this course will work towards these "Can do" goals:  1.I can examine current global and cultural issues and discuss them in a meaningful manner  2.I can do research to prepare presentations for the class   |          |       |         |          |                   |           |          |          |

| An ideal student in this class is someone who is not reluctant to offer ideas, be original, speak their opinion, or be flexible. They must also be committed to using English in all class situations. |            |   |          |       | N1 1 1  |          |                   |           |          |          |
