授業概要	<p>The aim of this course is to become able to introduce and explain Japan in English without reliance on support materials. The type of situation in which we are aiming to be able to achieve this is for example when guiding tourists in Japan, welcoming homestay guests or foreign visitors, or when asked to explain Japan when you are a visitor overseas. In this sense, we are aiming to be able to talk about Japan in an ad-lib style, without the use of powerpoint, etc. To develop the necessary skills to achieve this, we will firstly learn how to explain Japanese society, history and culture in English by using bilingual resources, and through this learn useful vocabulary and language patterns. You will be required to memorize these explanations, and practice them to the extent that you can not only deliver them smoothly but also be able to individualize them, adding additional information, including comparisons to other countries, and being able to respond to any questions. Being able to do this will require you to go beyond the textbook and research and understand yourself more about Japan and the world. When talking about and introducing Japan, it's also critical to go beyond the typical, and sometimes superficial, explanation points, and adequately represent the full diversity of Japan, including its Indigenous and regional cultures, and we will also investigate and discuss this together in class. In class you will be given many practical activities through which you can practice and further refine your skills. Please note that the specific topics to be covered and the amount of time to be spent on each topic may be revised according to student ability level.</p>
