担当教員	Malcolm Ross Swanson

授業概要	The aim of this course is to further develop the skills from the second year English Discussion course and to develop research skills through the use of challenge-based learning. Topics will be examined in an active-learning environment where the students will discuss current topics in depth and carry out research to gain a better understanding of the issues associated with each topic. Students are expected to work collaboratively on the various projects, then share their findings with class members using presentations and discussions in order to offer ways to resolve or better understand the challenges that each topic faces. Note: All classes will be taught in English.

授業形態	講義と演習	授業方法	This course will be taught using active learning activities. Students will need to participate fully to make the most of all activities.

学生が達成すべき行動目標

標準的レベル	It is hoped that students will: 1. improve their ability to discuss matters of substance. 2. be able to work collaboratively with others to produce a final outcome. 3. improve their research skills and their ability to present their findings. 4. find creative ways to solve problems in a variety of situations. It is expected that students will share their opinions during discussions. They should participate actively in all group work and discussions. Students must research each topic in depth and present their findings and conclusions as part of a team.
理想的レベル	An ideal student is one who freely shares their opinions during discussions. They take the lead in discussions and help get everyone involved. They research a topic deeply and are able to present the material in a clear and easy to understand manner.
