授業概要	Have you ever found yourself in a situation of having to explain something about Japanese culture and customs to a non-Japanese person? Maybe you had a homestay guest or a foreign visitor to your school. Perhaps you had an encounter with a tourist on the street. This course aims to give you the skills to introduce and explain Japan in English without reliance on support materials, without planning what to say, and without using any software. • We will firstly learn how to explain Japanese society, history and culture in English by using bilingual resources, and through this learn useful vocabulary and language patterns. • Then, you will be required to memorize these explanations, practice them to the extent that you can deliver them smoothly, add additional information, and be able to respond to any questions. • In class you will be given many practical activities through which you can practice and further refine your skills. Please note that the specific topics to be covered and the amount of time to be spent on each topic may be revised as the semester progresses. Note: All classes will be taught in English
